

"garden of time-dreaming, Linz, Austria

R3, Hannover Sound Art Festival

"harmonic bridge, MASS MoCA, permanent collection

cube O+A The "cube" is a signature loudspeaker developed by O+A for use in long term installations. It has special hemispheric dispersion qualities, and couples with the architecture of the site in a particular way. It also functions as a site marking icon, street furniture and a socially engaging hearing game, as its sonic qualities are surprising to people used to visual cues. It is also very hard to vandalize.
